## SOUTH AFRICA

The Guide to South African Higher Education

Study South Africa is the only comprehensive, up-to-date guide to South Africa's rapidly evolving higher education system. The Guide is published by the International Education Association of South Africa (IEASA) in association with Higher Education South Africa (HESA).

South Africa's university sector has undergone major transformation and restructuring processes geared to meet the higher education demands of the 21st Century. The country is becoming Africa's leader in the provision of quality higher education relevant to the demands of a rapidly globalizing, competitive and information-driven world.

Since the end of Apartheid and the birth of democracy in the 1990s, South Africa has attracted growing numbers of international students from across Africa and around the world – more than 60 600 in 2008, or just over 8% of the country's 761 000 higher education students.

South Africa is an exciting place to study. It is a country at the cutting edge of change where high-tech solutions, based on in-depth research, are being developed in response to some of the world's most pressing problems and challenges.

This new edition of Study South Africa has been revised and updated to provide accurate information on each of the country's 23 higher education institutions.

Study South Africa offers an excellent introduction to the stimulating world of higher education in South Africa, and an authoritative overview of important developments in the sector. This edition of the Guide also examines both sustainable development and sustainable human development and higher education's response to it.
